Zimbabwe printed a 100 trillion dollar note.

> It was worth about US$30.

That's 14 zeros.

10^{14}

a 1 with 14 zeros: Zimbabwe dollars, issued 16 January 2009

Inflation in one month:

79.6 billion %

Steve Hanke's estimate, November 2008

They kept cutting zeros.

- **2006** 3 zeros cut
- **2008** 10 zeros cut
- **2009** 12 zeros cut

April 12, 2009: the Zimbabwe dollar was suspended.

By 2015 the note swapped for about 40 US cents.

> Collectors now pay far more for it than it ever bought.

Hyperinflation is rare. Slow inflation isn't.

ZIMBABWE 2008

Prices exploded in months

AT 3% A YEAR

Prices double in about 24 years

Cash is for safety. Not for the long run.

Your inflation check:

1. Keep an emergency fund in cash
2. Check your savings rate vs inflation
3. Give long-term money a job
