73% of judges picked the AI as the human.

> A real Turing test.

One judge. One human, one AI. Five minutes of chat.

> The judge had to say which one was the person.

Not a stunt: 1,023 games.

284

people: 126 UCSD undergrads + 158 online participants

GPT-4.5, told to play a persona: picked as human 73% of the time.

73%

more often than the real humans it was up against

Same model, no persona.

WITH PERSONA

73%

NO PERSONA

36%

An introverted young person who writes in slang.

🙂
Introverted

💬
Casual slang

📱
Knows internet culture

A 1960s chatbot, ELIZA: 23%. GPT-4o: 21%.

> Raw power wasn't what fooled people.

Mostly on vibe.

CONVERSATION FLOW
23%

The best tell wasn't knowledge. It was not knowing.

> Accurate judges watched how answers handled questions and gaps.

YOUR RULE

Verify by channel, not by vibe.

1. Call back on a number you already have
2. Use a family code word for money asks
3. Never trust tone as proof
