84 housekeepers got one piece of news.

> Four weeks later, their blood pressure had dropped.

About 15 rooms a day. Many said they didn't exercise.

🛏️ Beds

🧹 Floors

🧺 Linen

7 hotels. 4 got the news. 3 didn't, yet.

INFORMED

44 women, 4 hotels

CONTROL

40 women, 3 hotels

"Your work already meets official exercise recommendations."

> With calorie examples posted where they worked.

Perceived exercise: 3.76 → 5.74 out of 10.

3.76 →

5.74

informed group, self-rated exercise (control stayed flat)

Systolic blood pressure 129.6 → 119.9.

BLOOD PRESSURE

129.6 → 119.9

WEIGHT

145.5 → 143.7 lb

No extra workouts. No new diet.

As reported by the women themselves.

One small study. Real caveats.

1. Women only, 84 people
2. Behavior was self-reported
3. Authors: changes small, mechanism unknown

YOUR MOVE

Count the movement you already do. Then add a little.

1. Take the stairs
2. Carry the groceries
3. Walk after lunch
