STANFORD, 2011

They slept more. Their sprints got faster.

11 basketball players. Two seasons.

> Cheri Mah and colleagues, journal SLEEP, July 2011.

2 to 4 weeks of normal sleep first.

> That set each player's baseline.

10 hours in bed a night, for 5 to 7 weeks.

10 h

nightly goal in bed

Time dropped by 0.7 seconds.

BEFORE	AFTER
16.2 s	15.5 s

Both shots improved.

No new drills. Just sleep.

11 athletes is a small study.

> A strong hint, not a promise.

Lights out 30 minutes earlier for one week.

1. Pick a fixed lights-out time
2. Phone outside the bedroom
3. Note energy each morning
